

SMARTER RETAIL. BETTER EXPERIENCE.

VisionLink from 365 Retail Markets

- ✓ One pre-auth.
- ✓ One receipt.
- ✓ One seamless experience.

1

HOW IT WORKS

A single pre-authorization invites the consumer to shop the whole market rather than just one door. VisionLink's backend "banks" the initial authorization, applying it across the entire array of units.

2

PARALLEL SHOPPING

Allows multiple patrons to shop different doors simultaneously, effectively eliminating checkout lines and maximizing peak-hour traffic.

3

CONSOLIDATED SETTLEMENT

The system intelligently bundles every selection into one transaction and one digital receipt, driving higher basket sizes and reducing the multiple bank holds that can lead to customer confusion.

LINKED EXPERIENCE

PARALLEL SHOPPING

CONSOLIDATED SETTLEMENT

MORE SALES. HAPPIER CUSTOMERS.
